

J2 leadership appointments — September 10, 2026

Document ID: SH-J2-PPL-20260910

Version: 1.0.0

Decision date: September 10, 2026

State: LOCKED

Scope: Six current named J2 leaders and their Sable Harbor joining years. No establishment, authority, compensation or financial-model changes.

Approved roster

Person	Current office	Joined Sable Harbor
Jonathan Goldstryker	Head of J2	2020
Amanda Chenahot	Deputy Head of J2	2021
Mara Hammer	Head of Contact	2021
Anika Trish	Head of Judgment	2021
Grant Kohrs	Head of Orientation	2020
Brett Calder	Head of Education	2021

These are six distinct current people occupying existing institutional roles. Joining years are company joining years, not exact hire dates, J2 founding dates, appointment dates, commission dates or proof of uninterrupted service in the present office. Those separate historical facts remain unrecorded unless another accepted source establishes them.

Originating decisions and corrections

The owner approved the roster in the September 10 leadership session and explicitly instructed repository implementation. Preserve the final decisions, not discarded suggestions:

- Jonathan Goldstryker was selected as Head of J2; the proposed 2020 joining year was accepted.
- Amanda Chenahot replaced the proposed Joe Manyfingers as Deputy Head of J2; 2021 was expressly retained. The proposed Arapaho background belonged only to the discarded Joe proposal and is not assigned to Amanda. This decision does not create a current or historical Joe Manyfingers employee record.
- Mara Hammer was selected as Head of Contact, joined 2021.
- Anika Trish was selected as Head of Judgment, joined 2021. The last name is literally Trish. The intervening spoken reference to Contact did not replace Mara or change Anika's selected office.
- Grant Kohrs replaced the rejected Elena Marques suggestion as Head of Orientation. The owner spelled the surname K-O-H-R-S and corrected the joining year from 2021 to 2020.
- Brett Calder was selected as Head of Education, joined 2021.

No discarded suggestion supplies another appointment. No ethnicity, degree, age, former employer, family history or detailed career is inferred from a name.

Existing offices and authority remain controlling

The [J2 establishment](#), [headquarters doctrine](#), [J2 charter](#) and current arm-specific doctrine continue to define the offices. This record supplies occupants, not a new operating model.

Jonathan's institutional remit is stewardship of professional standards, boundaries and continuity under the headquarters doctrine. Mara's collection tradecraft and external-engagement remit operates within Contact's existing authority; it does not create operating-business command or permission beyond existing collection rules. The remaining offices inherit their existing doctrine without new delegated powers.

The Head of J2 retains administrative reporting to the CEO and protected Board access. Orientation's enterprise intelligence priorities, Judgment Officers' individual problem ownership, Contact's collection-method authority, the rotating JAG structure, Education's professional role and operating-business autonomy remain unchanged. J2 does not become Internal Audit, Risk & Compliance, Legal, an operating command or an Advisory staffing pool.

The 237-billet establishment is unchanged. Six names do not add six billets or authorize six incremental salaries; appointments into existing roles must not be double-counted in workforce or finance models.

Explicit remaining personnel scope

This is not a complete named J2 headquarters or arm roster. The Chief of Staff, Deputy Heads of Contact, Judgment and Orientation, other professional and administrative billets, exact appointment histories and personal biographies remain OPEN where not separately established. Issue #19 must be narrowed, not closed as though every J2 personnel question were settled.

Repository representations

The people register and current organization-chart source/publication must represent the six names, offices and joining years consistently. Preserve established role identifiers and historical release bytes. Do not rewrite source-pinned finance inputs or create person-to-person reporting relationships not established by doctrine. Current indexes must link this decision and distinguish remaining unnamed roles from these six resolved offices.

Acceptance evidence belongs in the implementation PR and validation record. A branch, conversation approval or this file alone is not a claim that charts, publications, validation or main-branch integration are complete.
