

Sacramento headquarters exterior image successor

Document ID: SH-CORP-HQ-IMAGE-20260922

Version: 1.0.0

Decision date: September 22, 2026, America/Los_Angeles; exact utterance time unavailable

Owner: Alex Kaper

State on acceptance: LOCKED

Related: SH-CORP-HQ-20260903; HQ-003; GitHub issue #88

Owner direction and current image

The owner first directed a review of current headquarters sources and generation of a new image. After the reviewed rendering was delivered, the owner directed Codex to **fix the image**. This record adopts the exact new rendering below as the **current Sacramento headquarters exterior visual reference**, subject to repository acceptance. It is newly generated artwork, not recovered September 3 pixels.

The approved exterior is reproduced in the final image plate.

Source identity	Value
Current source PNG	assets/headquarters/exterior/2026-09-22/sacramento-hq-exterior.png
SHA-256	3296663d8c7be71bca8aee5fad953a6a96b1ecf03a4b021a8dce48f9295afaf3
Dimensions	1672 × 941 pixels
Source size	2,730,619 bytes
Origin	Newly generated image using the built-in image generation tool, reviewed against accepted campus and visual sources
Provenance	Prompt , source review , artifact receipt

Exact supersession and preserved history

This decision **supersedes HQ-003 only for which exterior image is current** and replaces the missing-original ingestion requirement as the current visual-publication gate. The September 3 approved source hash 2bf5a1209b9c3ece435271f2fbf5a3c827bbbccf242ea4ee60535749ccee9d92 remains a true historical approval identifier; its bytes have not been recovered. The September 3 canon document, decision register, structured representation and already published PDFs retain their dated meaning and bytes. No record may label the new PNG as that old file or claim its hash matches.

The earlier brochure/San Jose and Capitol/collage treatments remain rejected. The accepted R01 four-sheet campus package and V08 visitor illustration retain their own identities and source bytes. This image does not replace their plan geometry, floor layouts or visitor routing.

What the new reference depicts

The image depicts four low-rise volumes in the accepted campus relationship, viewed from the southern arrival toward a landscaped central quad. It retains Sacramento twilight, glass, dark metal, light concrete, warm wood, trees,

grasses, stone, water, a restrained glass connection and the three-line Sable Harbor monument. No people or invented Capitol/San Jose landmark appear.

The facade rhythm, connection detail, reflecting-water geometry, planting and camera are illustrative choices. Rear heights are partly obscured in this view. The image is **not** a scaled plan, survey, construction record, property-title evidence, exact floor-count proof or record of a newly completed building. Campus occupancy and capacity continue to come from their own accepted sources.

Publication and lifecycle

The PNG is approved source artwork in Git. Its SHA-256, dimensions and size must match the current image manifest and controlled publication source-asset inventory. The controlled PDF reproduces these exact pixels; the PDF, catalog and Wiki route derive from this decision. Do not regenerate the picture to reproduce a release: image synthesis is not byte-deterministic.

This decision is effective as the current visual reference when the source, PNG, publication and manifest are accepted together. The previous company edition 1.2.0 and other historical releases retain their original contents. A new publication/release records the accepted successor.

Controlled publication • Generated from docs/canon/HEADQUARTERS_IMAGE_SUCCESSOR_2026-09-22.md • Do not alter PDF manually
