

SABLE HARBOR

CORPORATE IDENTITY SYSTEM

Production standards, identity architecture, collateral, and governance

VERSION 0.2.0 | 2026-09-01

1. Governing design idea

Variation is normal. The work is to encounter it, represent it, understand it, and choose consciously what happens next.

The identity system is built from explicit geometry, visible seams, bounded channels, junctions, strata, and controlled points of integration. It avoids literal harbor imagery, generic technology symbols, faux heraldry, gradients, shadows, and decorative claims that are not supported by canon.

The marks do not create corporate canon. They represent names and roles already established in the controlling corporate-lore documents. OPEN legal entities, reporting lines, titles, economics, and launch details remain open.

SABLE HARBOR

2. Master-brand lockups

Five master configurations support the same mark in different operating contexts. Use the configuration that fits the available field rather than distorting another configuration.

Primary Horizontal

Use without altering proportion, spacing, or color relationships.

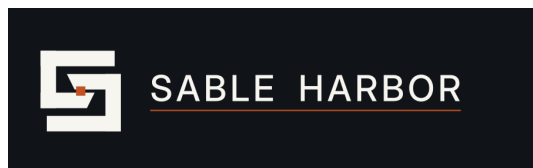

Stacked

Use without altering proportion, spacing, or color relationships.

Mark

Use for icons and small identifiers.

Reverse Horizontal

Use without altering proportion, spacing, or color relationships.

One Color Horizontal

Use without altering proportion, spacing, or color relationships.

3. Identity architecture

Sable Harbor is the corporate master brand. Seven 2026 lines receive the full five-lockup system. Supplemental assets and historical identities remain visibly subordinate and must not be presented as current legal entities unless later canon says otherwise.

	Foundry Field current core business line	LOCKED name and role.
	Willow current core business line	LOCKED name, purpose, and two-center operating model; exact legal structure remains OPEN.
	Atlas Meridian current core business line	LOCKED product lineage and decision-support boundary; launch details remain OPEN.
	Pale Sun current operating business line	LOCKED operating thesis; detailed mine, transaction, permitting, and economic facts remain OPEN.
	Project Cradle current core business line	LOCKED thesis and founding team; first commercial details remain OPEN.
	American Resource Utility current distinct operating company and core line	LOCKED name and operating role; detailed history, routes, assets, workforce, and legal structure remain OPEN.
	Advisory emerging current business line	LOCKED direction; exact name, leader, launch date, service catalog, P&L, and organizational home remain OPEN.
	Foundry supplemental product substrate	LOCKED distinction from Foundry Field.
	Red Wash Mine operating asset under Pale Sun	LOCKED fictional mine name; detailed asset facts remain OPEN.
	Blood, Sweat & Tears Railway ARU operating component	LOCKED name and relationship to ARU; legal identity, routes, assets, and history remain OPEN.
	Emberline historical business line	LOCKED historical status: active through 2025, then absorbed into enduring 2026 work.
	Evalon historical advanced-engineering outpost	LOCKED historical concept; closed and rechartered as Willow in 2022.

4. Color system

HEX and RGB values are controlling for digital use. CMYK values below are working conversions, not press-certified recipes. Commercial print production requires substrate, ink, profile, and proof validation. No Pantone number is asserted by this package.

COLOR	HEX / RGB	CMYK APPROX.	
Sable Harbor Ink	#101214 16, 18, 20	20, 10, 0, 92	
Sable Harbor Orange	#C45124 196, 81, 36	0, 59, 82, 23	
Field Green	#315F4D 49, 95, 77	48, 0, 19, 63	
Meridian Blue	#2E6F96 46, 111, 150	69, 26, 0, 41	
Pale Sun Gold	#C38B1F 195, 139, 31	0, 29, 84, 24	
Advisory Steel Blue	#456C98 69, 108, 152	55, 29, 0, 40	
Red Wash Oxide	#B94C2C 185, 76, 44	0, 59, 76, 27	
Evalon Steel	#687C86 104, 124, 134	22, 7, 0, 47	
Paper	#F4F1EA 244, 241, 234	0, 1, 4, 4	
Reverse Field	#101419 16, 20, 25	36, 20, 0, 90	
Reverse White	#F7F5EF 247, 245, 239	0, 1, 3, 3	
Muted Gray	#747A80 116, 122, 128	9, 5, 0, 50	

5. Reproduction rules

Clear space

Maintain clear space at least equal to the central accent square around the complete lockup.

Minimum sizes

Horizontal lockups: 32 mm print / 180 px digital. Stacked lockups: 22 mm / 120 px. Marks: 6 mm / 24 px, subject to a legibility check.

Color

Use primary color on light fields, reverse on dark fields, and one-color for stamps, engraving, fax, or restricted reproduction.

File choice

SVG is the production source of truth. PNG is a convenience render. PDF collateral is print-ready only after local proofing.

Prohibited treatments

Do not distort, rotate, bevel, shadow, outline, add gradients, recolor outside the approved palette, place over noisy imagery, or substitute literal harbor, mine, railway, or generic AI clip art.

Endorsements

Do not create new combined identities. Use only provided endorsed lockups and preserve the corporate/operating relationship stated in canon.

Historical identities

Evalon and Emberline must be marked historical. Evalon is an outpost predecessor to Willow, not a current business line.

6. Collateral system

The package includes US Letter and A4 letterhead, memo and report templates, editable SVG sources, PDF and PNG print references, and a 16:9 PowerPoint template. All address and contact fields are explicit placeholders; the templates do not invent a headquarters address, telephone number, email address, or public domain.

Letterhead	US Letter + A4: SVG, PNG, PDF, DOCX
Memorandum	US Letter: DOCX + PDF reference
Report	US Letter + A4: DOCX; cover SVG, PNG, PDF
Presentation	16:9 PPTX with title, agenda, divider, content, comparison, business-line, and close layouts
Packages	Logo system, collateral package, and complete brand kit ZIPs with checksums

7. Governance and legal posture

The production artwork is a working corporate-identity candidate for the synthetic enterprise. It does not independently establish a legal entity, trademark right, reporting relationship, operating authority, or public commercial use.

Inter Display Medium, Semibold, and Bold were used as construction sources; wordmarks in production logo SVGs are converted to vector outlines. Font binaries are not distributed. The typeface project is licensed under the SIL Open Font License 1.1; see FONT_PROVENANCE.md.

A preliminary name-and-mark screen is included for planning. It is not a legal opinion, a comprehensive clearance search, or a determination of registrability. Several names are crowded or conflict-prone for software, industrial technology, logistics, or advisory services. Obtain U.S. trademark counsel before external commercial adoption.
