

Demotte Reclamation Services — separate Cradle work-order instrument

Document ID: SH-CRADLE-DEMOTTE-B-20260922

Version: 1.0.0

State: newly authored synthetic execution, pending repository acceptance. **Authored/execution record:** September 22, 2026, 17:12:06 UTC. **Prospective framework eligibility:** October 1, 2026, subject to acceptance.

Parties are **Sable Harbor, LLC**, acting through its Cradle business, and **Demotte Reclamation Services**, external host of SH-SITE-0027. Neither instrument appoints the other host or creates a legal entity.

Incorporated agreement

This instrument adopts **alternative B and all eight common terms, verbatim by incorporation**, of [SH-HOST-TERMS-20260922](#), whose exact bytes are pinned in the [structured source](#). Alternative A is excluded. The September 22 [owner decision](#) supplies authority.

Maximum order duration is 90 calendar days, with no access between orders or automatic renewal; early exit requires 30 days' documented received notice. No new exclusive grant. Host operating authority and bypass remain unrestricted by any feed guarantee. No commercial title from held samples; sale-capable order must specify capture/title point before release.

Governing law: **West Virginia, United States**; forum: **Nonexclusive competent courts in West Virginia, United States**, preserving mandatory law. No arbitration, jury waiver, exclusive forum or immunity is added. Commercial statements are due within 20 calendar days of month end; undisputed payment within 30 calendar days of documented statement receipt. Each future order must expressly state proceeds, deductions, currency, host payment formula and cost responsibility; this framework sets no rate or minimum charge.

Fictional execution and administration

The source newly appoints **Kenji Arakawa (P025)** narrowly for SHI and **Daniel Mercer (SYN-HOST-DEMOTTE-REP-001)** narrowly for this host, and records their fictional mutual assent under **SYN-EXEC-DEMOTTE-20260922**. These are authored administrative execution facts under the approved direction, not claims of recovered signature evidence, real host authority or contact. The external representative is not a SH employee.

The commercial receipt channel is **SYN-CONTRACT-RECEIPTS-DEMOTTE-001**: a synthetic receipt register requiring actual documented receipt by the appointed representative, UTC timestamp and host-local date. **SH-HOST-RECORDS-DEM-001** routes records only; routing is not effective notice or legal service. Existing operating role **DEMOTTE_HOST_OPERATING_OWNER** retains operational responsibility without being silently made the contracting signatory.

Current population and financial boundary

There are **zero accepted work orders** under this instrument. Thus no active prospective run, reserved feed, customer sale or new cash obligation is asserted. Historical economics and exceptions remain as recorded. Expiry ends permission for new recovery; existing genealogy and supported unpaid settlements survive. Equipment removal/reinstatement requires a separate safe work plan; no new removal fee, forfeiture, lien or historical-contamination liability is created.
