

Geographic framework

Named constraints are recorded. Search-envelope vertices remain implementation proposals.

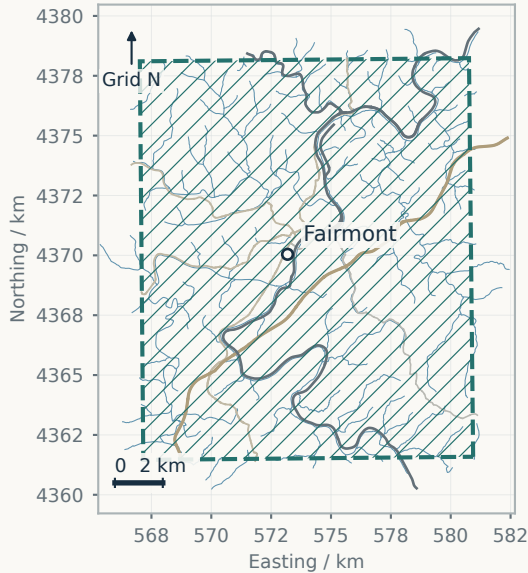

GOVERNED FRAMEWORK / SITE ENGINEERING IN PROGRESS

SACRAMENTO

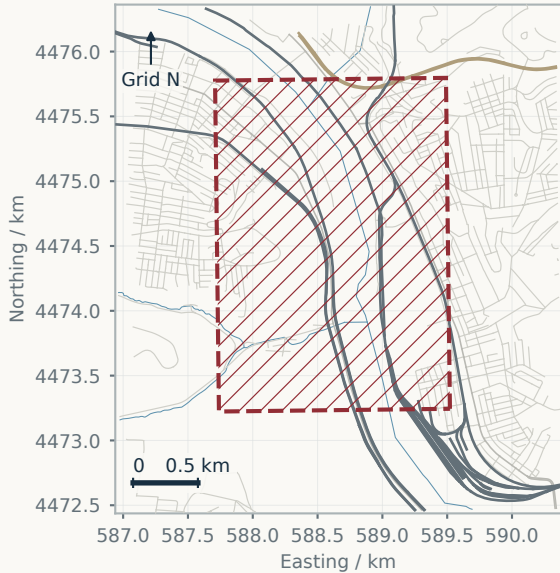

HQ: Railyards / River District seam | EPSG:26910

FAIRMONT AREA

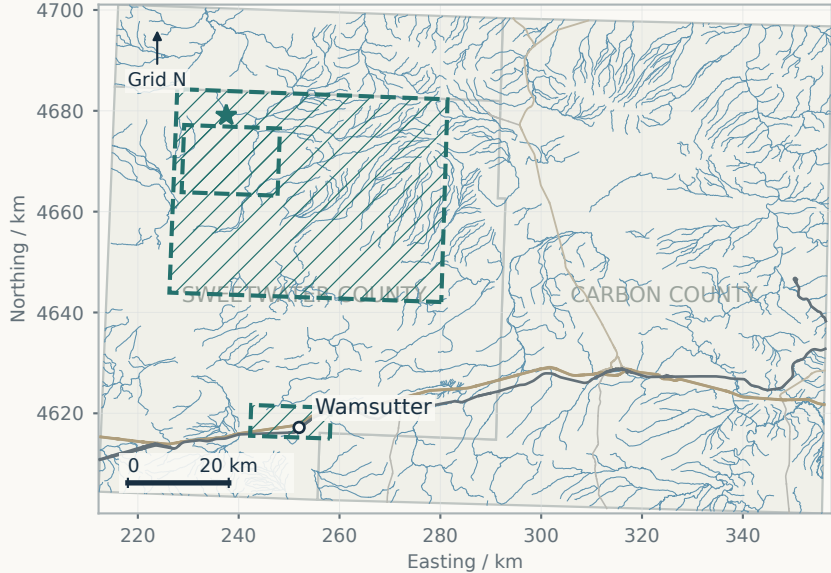

Bedford: Cradle development / upgrading center | EPSG:26917

PITTSBURGH

Fort: separate premises; 2024 relocation | EPSG:26917

WYOMING

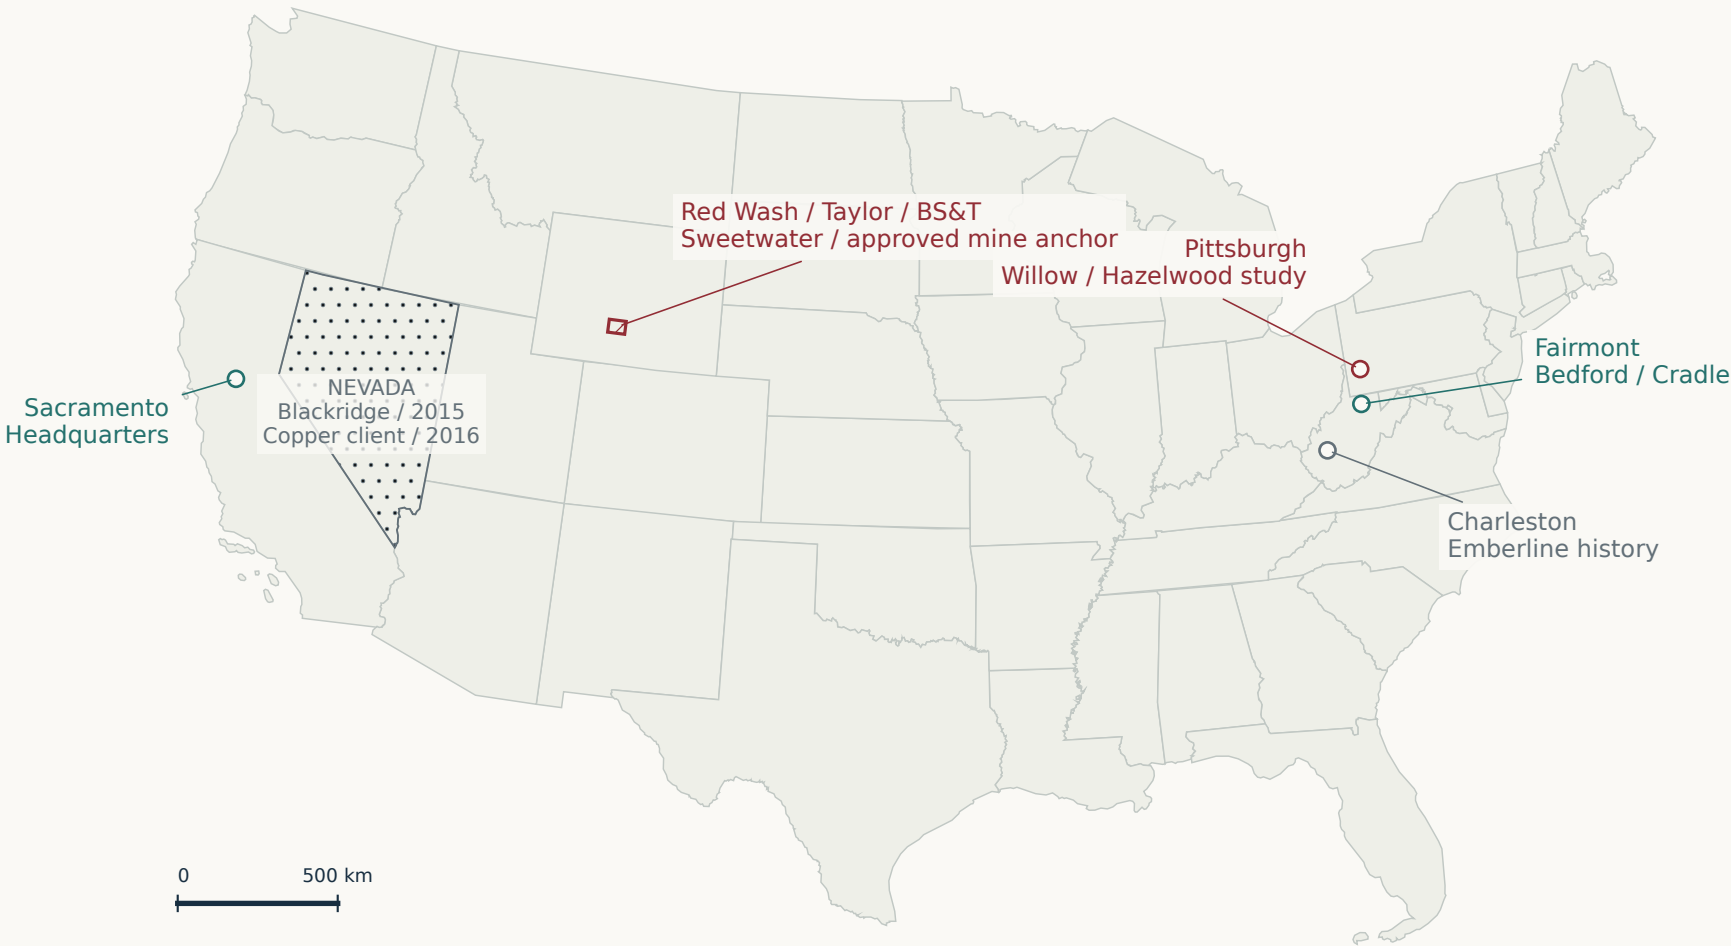

Red Wash / Taylor / Wamsutter: approved addendum | EPSG:26913

Corporate geographic census

Operating geography, study areas and historical context are distinct records.

CITY / REGION SCALE / NOT AN OWNED-PROPERTY INVENTORY

REGISTERED, UNLOCATED

J2 Education campus • J2 accommodation • Alexandria hosting • early railway alignments
Cradle host parcels • historical offices • provisional Reno / Elko / Tucson offices

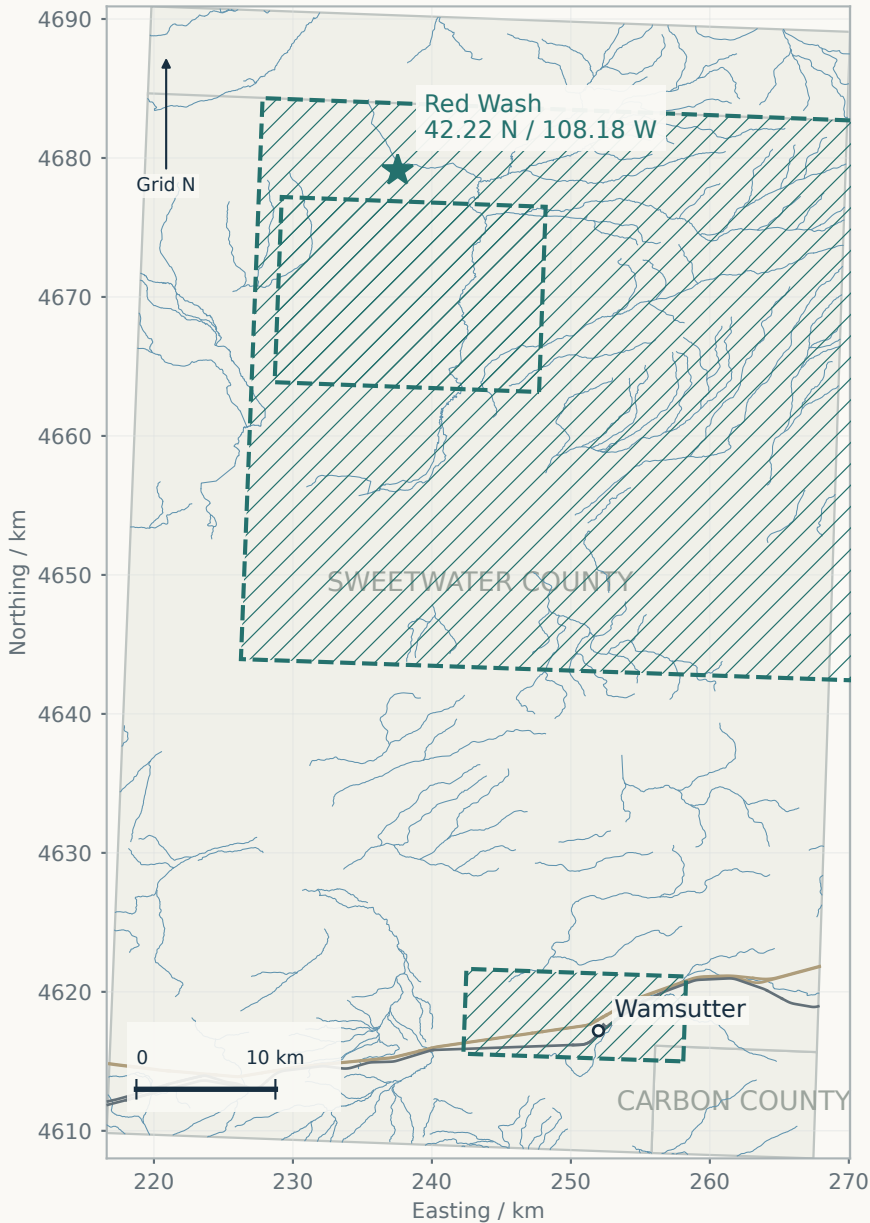

INTERNATIONAL HISTORY

2022: Sar-e-Sang / Badakhshan, Afghanistan
2024: South Australia; Mole Creek / Deloraine, Tasmania

Red Wash / Sweetwater County

Approved fictional mine anchor: 42.22 N / 108.18 W. Full site and access geometry are separate work.

CURRENT GOVERNING ADDENDUM / CARBON COUNTY PIN SUPERSEDED

CONTROLLING DECISION

The approved addendum locates this fictional underground uranium mine in the Great Divide Basin / Red Desert, Sweetwater County, north of Wamsutter.

ANCHOR PRECISION

The coordinate is a fictional mapping control. It is not a real mine identity, surveyed portal or property boundary.

TAYLOR AND BS&T

Taylor replaces the former town name and serves as the fictional railway operating hub. Approved service uses Taylor transload and truck last mile. No mine spur is included.

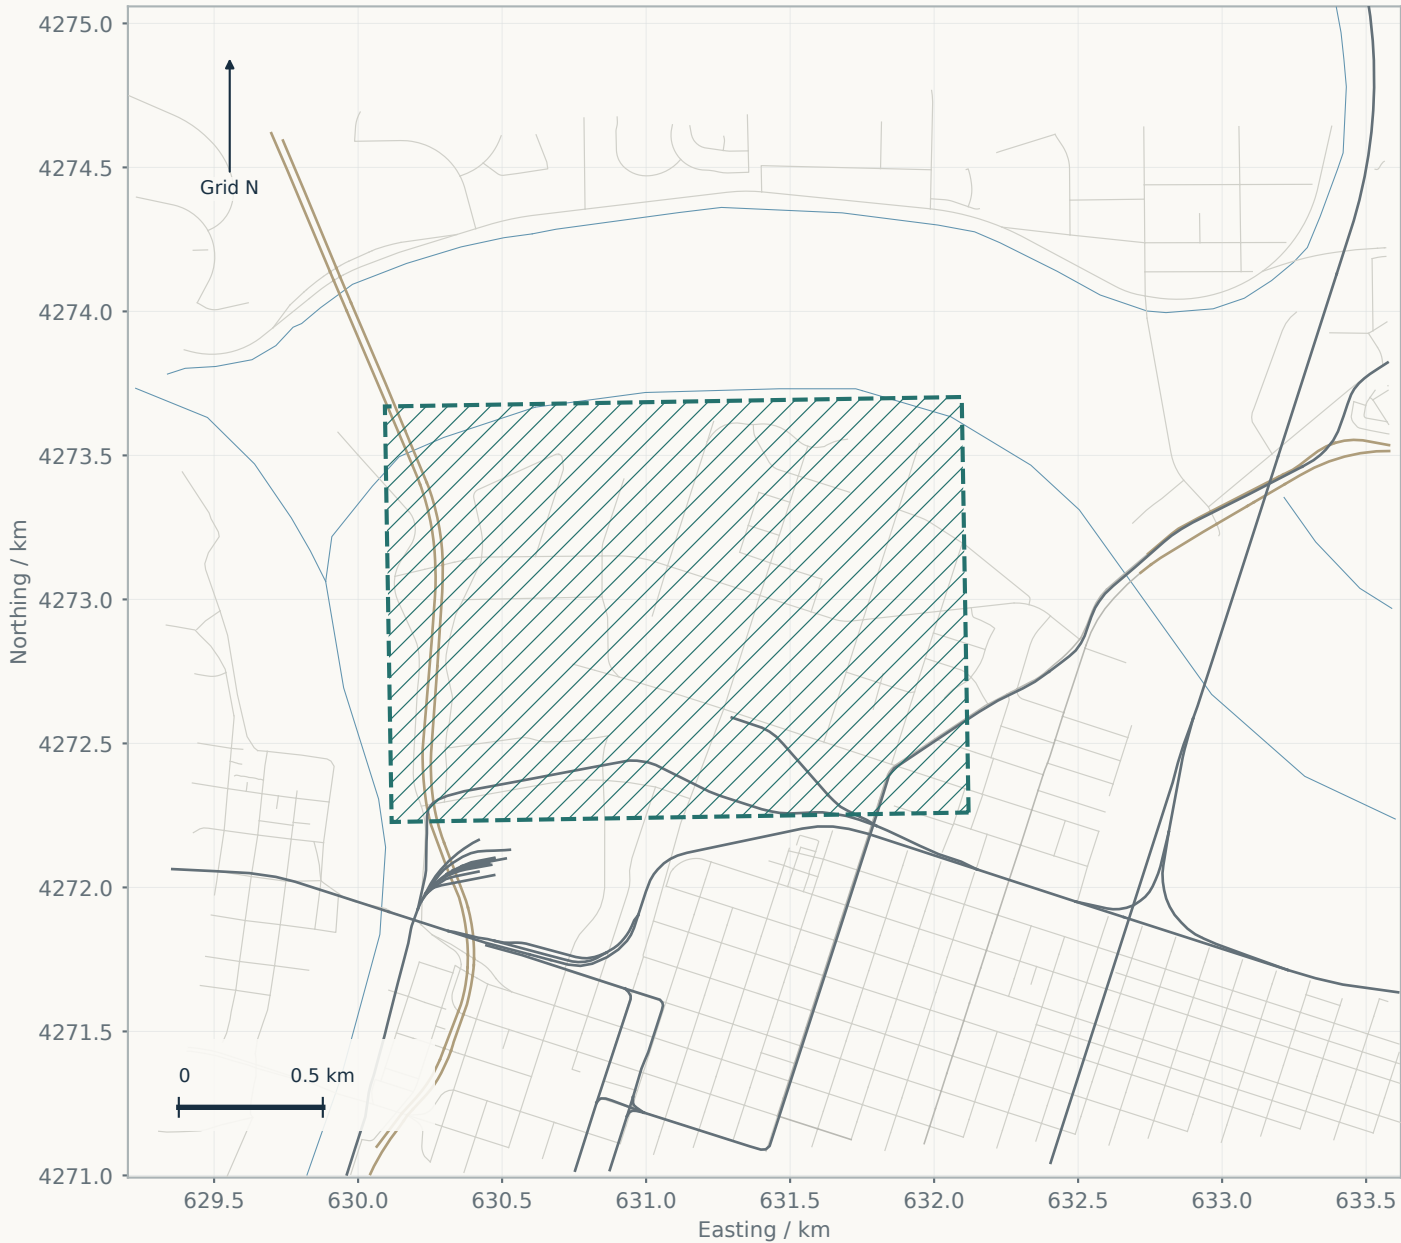

PRESERVED HISTORY

The original Carbon County artwork and earlier derivatives are retained as superseded evidence. They no longer control current geography.

Sacramento headquarters

Railyards / River District seam; fictional campus envelope still to be selected.

STUDY GEOGRAPHY / EXACT SITE AND PROPERTY INTEREST UNRESOLVED

LOCKED DIRECTION

Sacramento headquarters with an advanced research and industrial institutional character.

WORKING SCALE

8-15 acres. The hatched area is a district search window, not that campus footprint.

REAL CONSTRAINTS

Rail corridors, local streets, river setting and an active redevelopment district. Public data does not convey real parcel title.

SITE WORK REMAINING

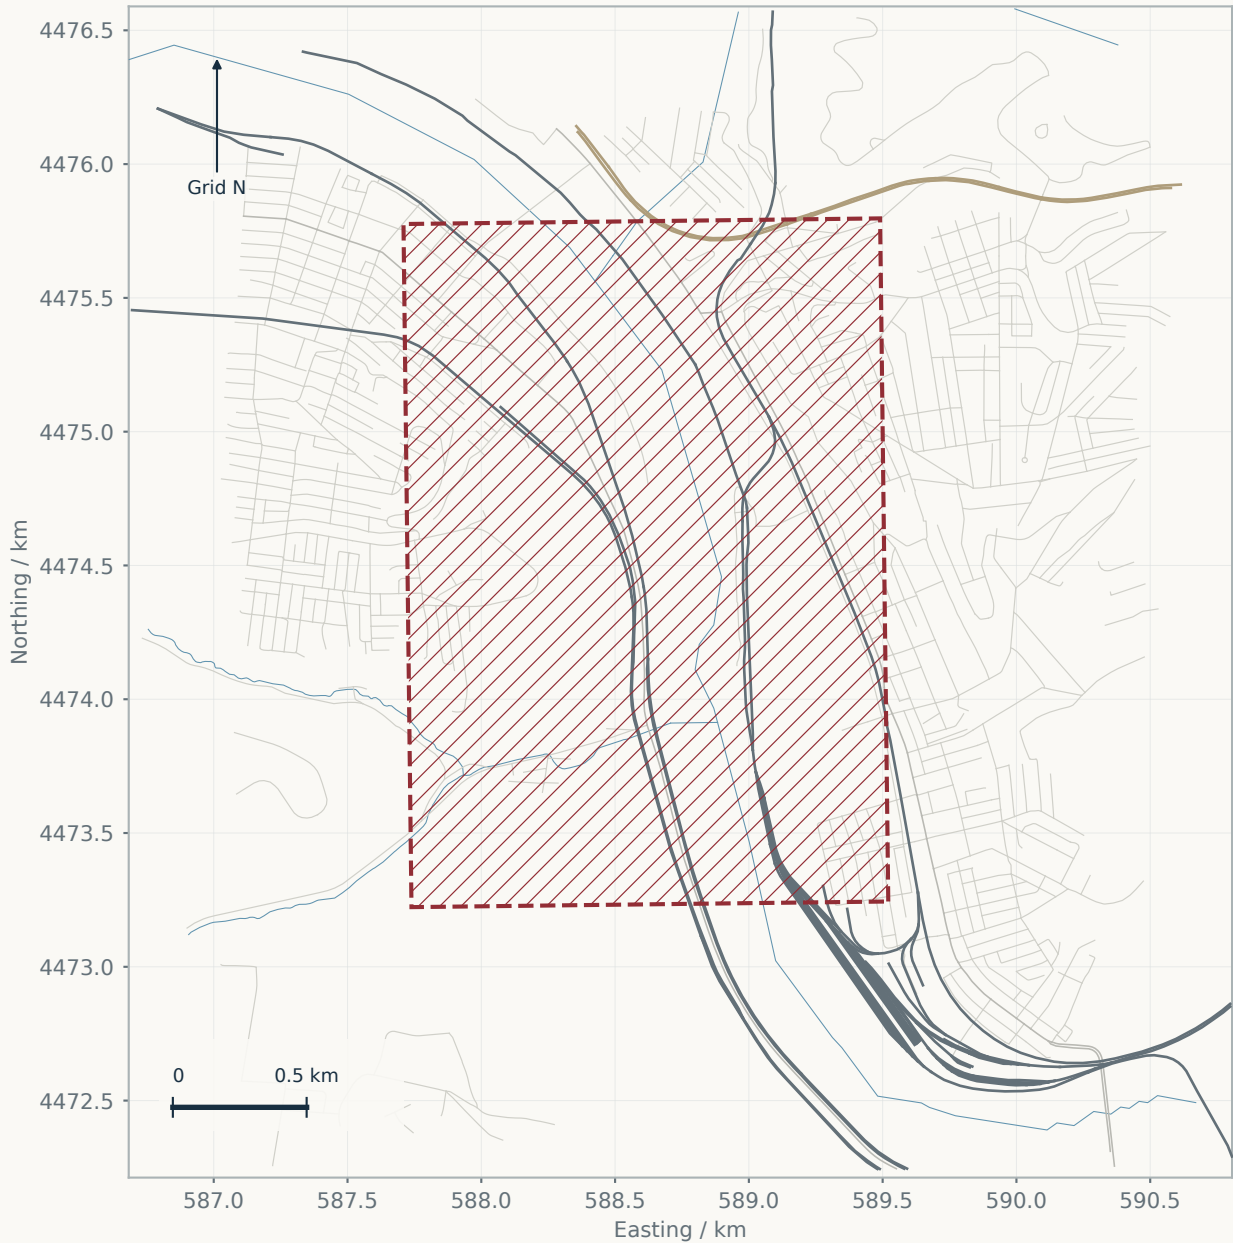

Screen current parcels, occupied facilities, planned projects, levee/flood context and access before selecting a footprint.

- Analyst search envelope
- Disputed source geography
- Real railroad reference
- Highway / road reference
- Hydrography reference

The Fort / Willow

Pittsburgh industrial compound; Klein's earlier shop history is separately preserved.

STUDY GEOGRAPHY / EXACT SITE AND PROPERTY INTEREST UNRESOLVED

LOCKED SITE CONCEPT

10-20 acres. Big Shed: research and laboratory. Small Shed: administration and temporary lodging.

OPERATIONAL GROUNDS

White Shed: controlled intake, storage and quarantine. The Museum: working yards and retained industrial artifacts.

HISTORICAL PRECISION

Klein's earlier shop was outside Pittsburgh. Willow moved to separate Fort premises during 2024. Exact entry days and parcels remain unknown; GEO-C002 is resolved.

REAL-SITE BOUNDARY

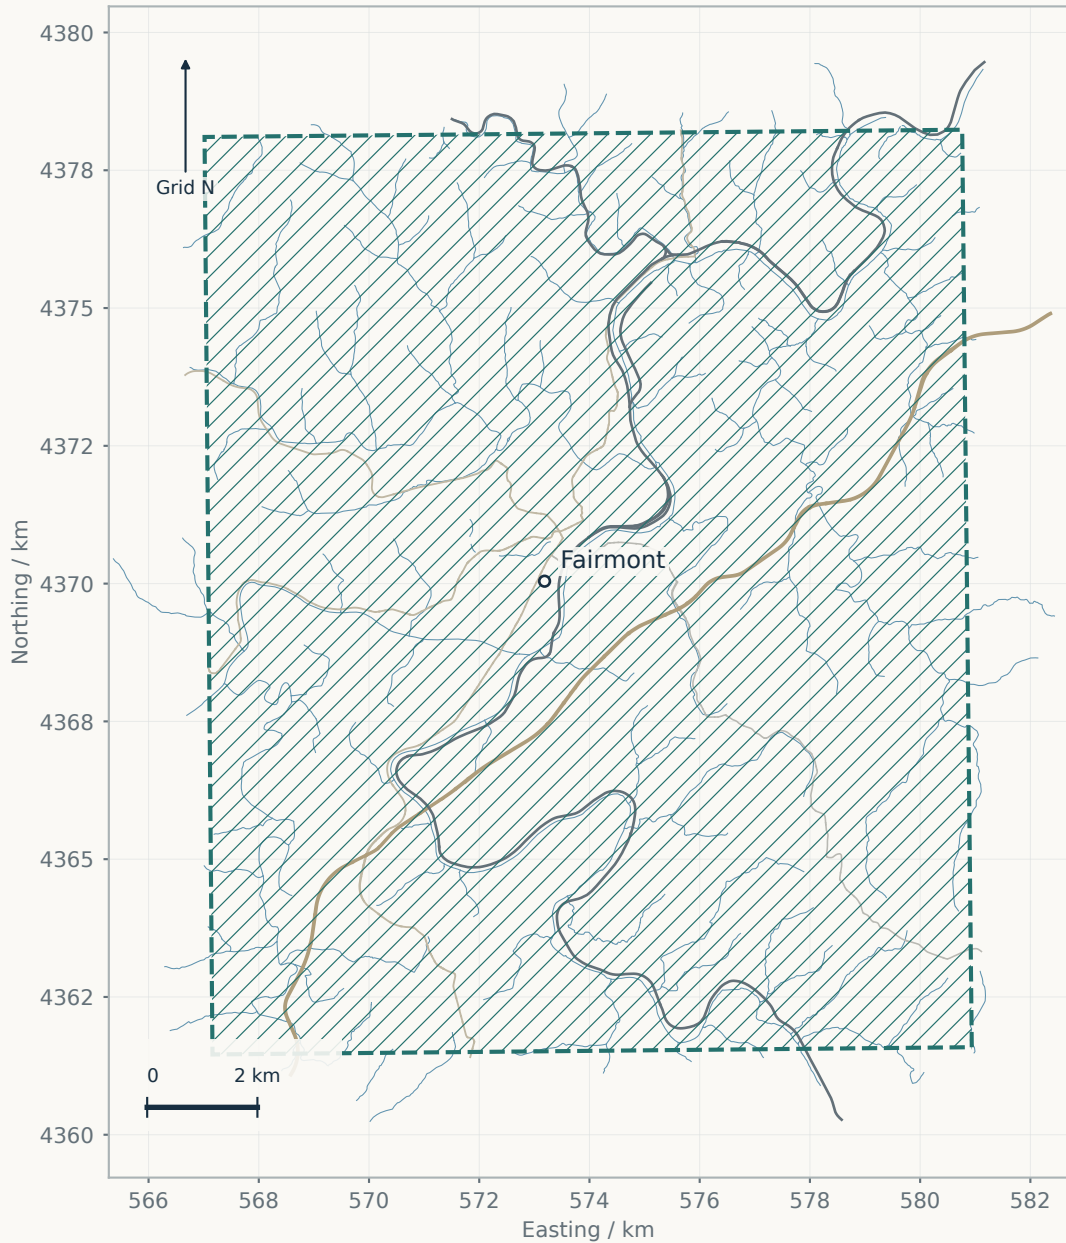

Hazelwood is retained as a study district. No real tenant, parcel, lease, or development is claimed.

- Analyst search envelope
- Disputed source geography
- Real railroad reference
- Highway / road reference
- Hydrography reference

Bedford / Cradle

Fairmont-area development, integration and upgrading center; separate from field deployments.

STUDY GEOGRAPHY / EXACT SITE AND PROPERTY INTEREST UNRESOLVED

LOCKED DIRECTION

Bedford: a fictional 15-20 acre redeveloped industrial brownfield near Fairmont in north-central West Virginia.

DISTINCT FIELD HOSTS

Demotte: north-central WV AMD treatment host. Kelly Gang Mining: Tasmanian Stream 17 host. Neither is the Bedford center.

SUPERSESSION

Belle / Kanawha was an earlier site proposal. It is preserved as editorial history, not current Cradle geography or a relocation event.

IMPLEMENTATION REMAINING

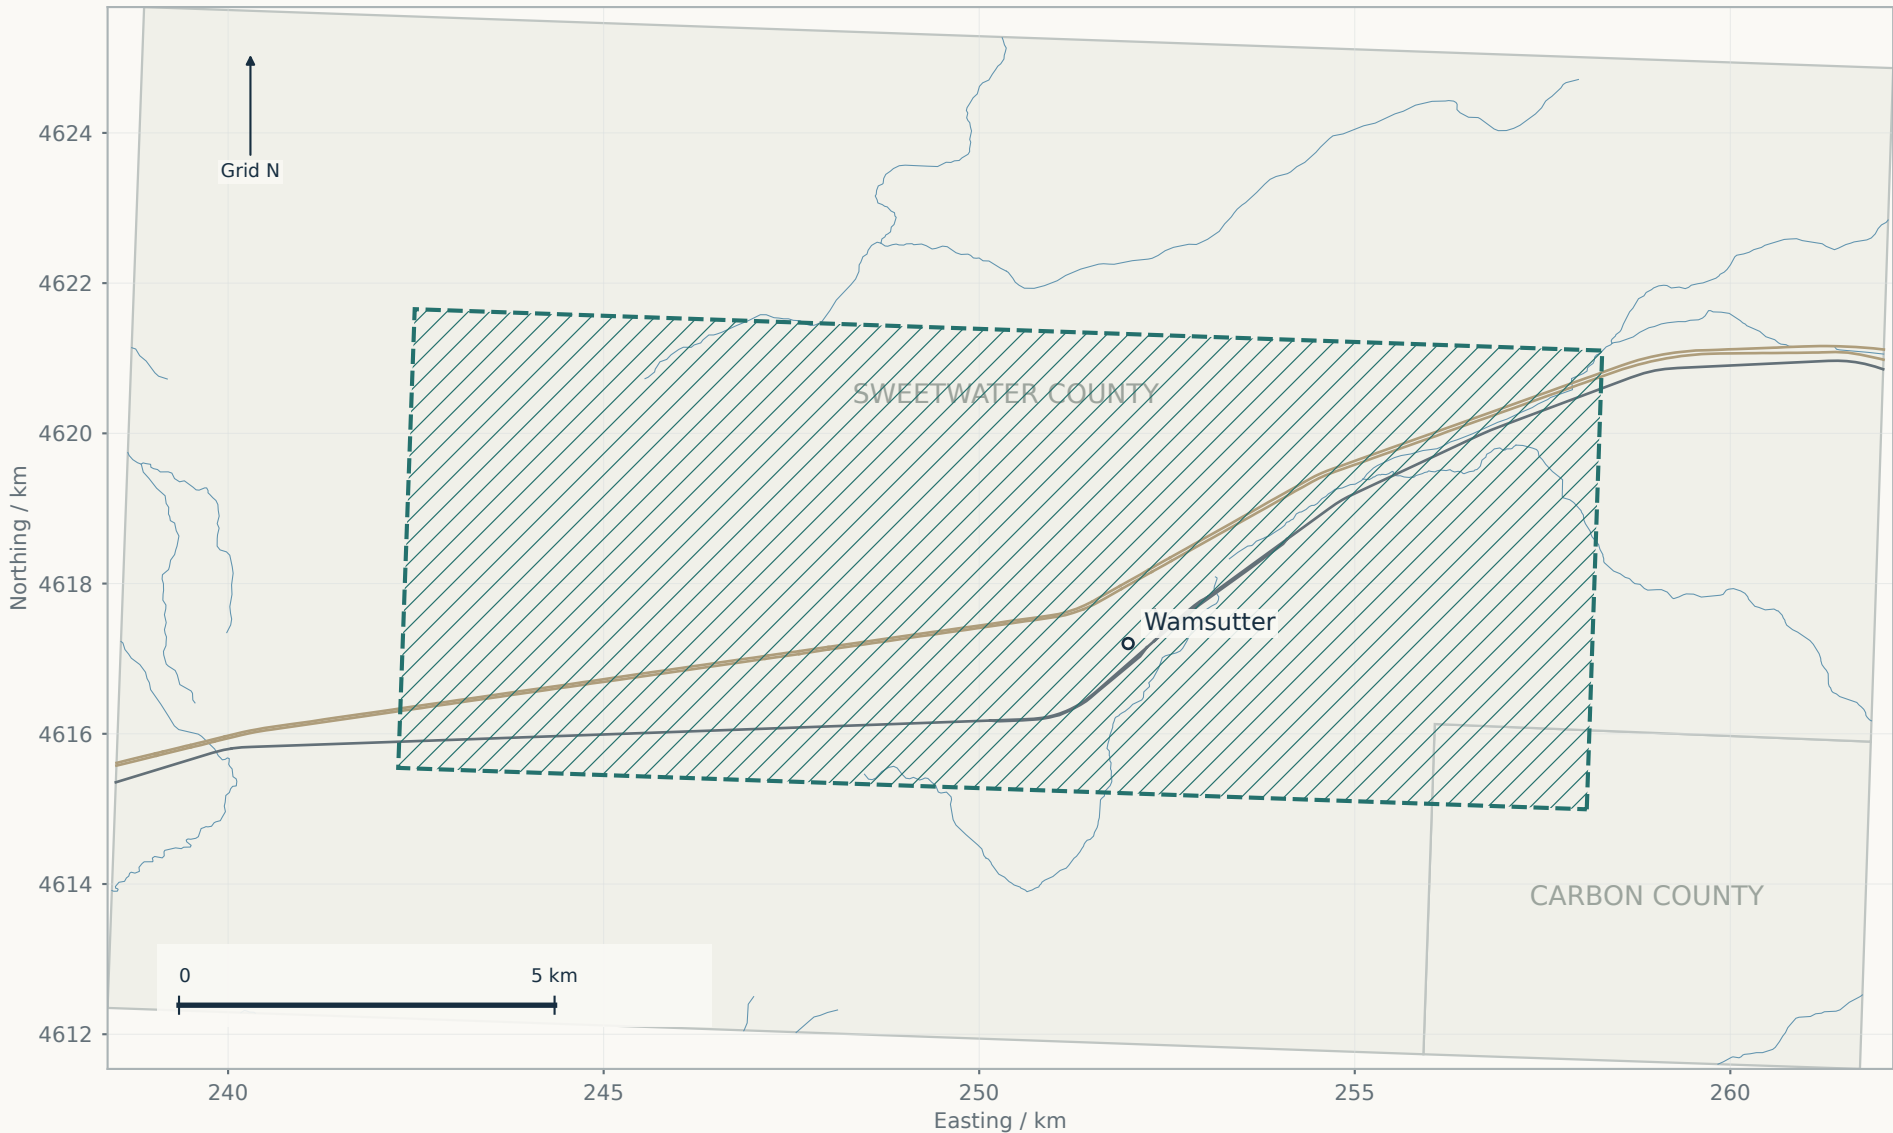

Exact parcel, industrial access, utilities and brownfield constraints. Dedicated rail or barge access is not selected.

- Analyst search envelope
- Disputed source geography
- Real railroad reference
- Highway / road reference
- Hydrography reference

Wamsutter interchange study

Real railroad context for a accepted fictional interface; real UP geometry remains reference only.

STUDY GEOGRAPHY / EXACT SITE AND PROPERTY INTEREST UNRESOLVED

REAL HOST CORRIDOR

FRA rail records around Wamsutter identify UP ownership. The reference geometry remains Union Pacific infrastructure.

FICTIONAL SCOPE

Accepted case: Wamsutter connection, 18-acre envelope and synthetic interchange agreement; no actual UP rights.

HISTORICAL BOUNDARY

All 2025 mine movements remain external-carrier. The later mine interface is truck-only.

NEXT ENGINEERING GATE

Candidate A and January 7 acquisition are settled. Survey and real land/operating rights are not certified.

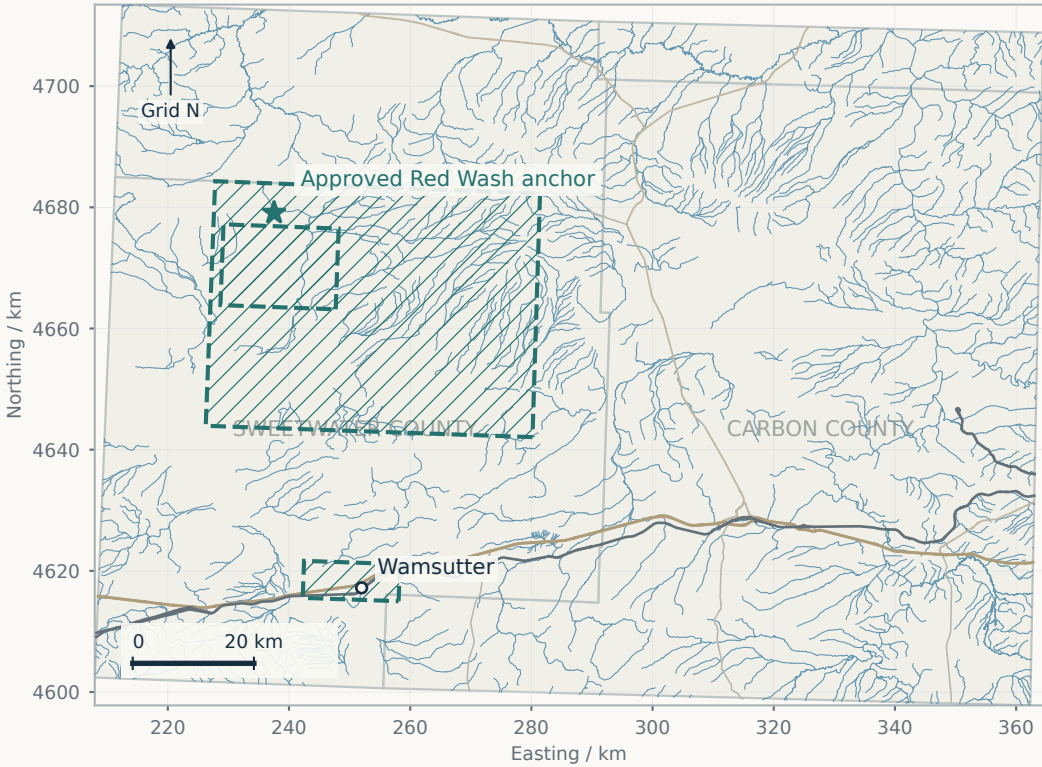

- Analyst search envelope
- Disputed source geography
- Real railroad reference
- Highway / road reference
- Hydrography reference

Open geographic questions

Source conflicts and unknown physical locations remain visible, without invented pins.

DECISION REVIEW / INITIAL PROGRAM INCOMPLETE

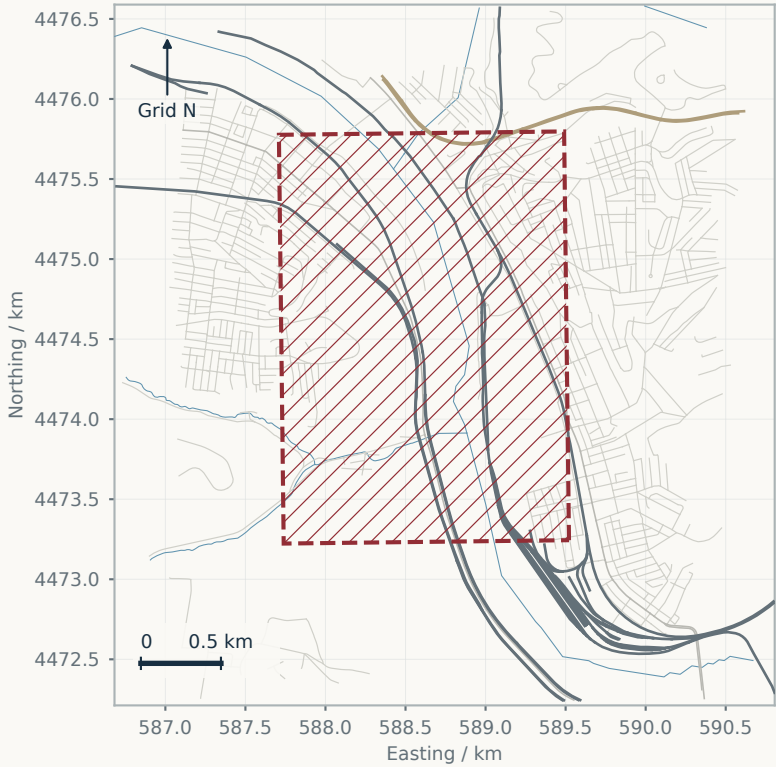

GEO-C003 / ENGINEERING GATES — WYOMING

RED WASH AND BS&T

The mine anchor and Taylor name are approved. ARU closes on 07 Jan 2026. Taylor hub and truck last mile are approved; no mine spur. Current industrial sources supply 40 rail miles, two branches and nine-mile truck access. Final survey and early historical alignments remain separate.

PITTSBURGH — CONTINUITY RESOLVED

KLEIN AND WILLOW

Owner-approved history: Willow used the old Klein shop after recharter, moved to separate Fort premises during 2024 and vacated the old shop that year. Exact days and parcels remain unknown.

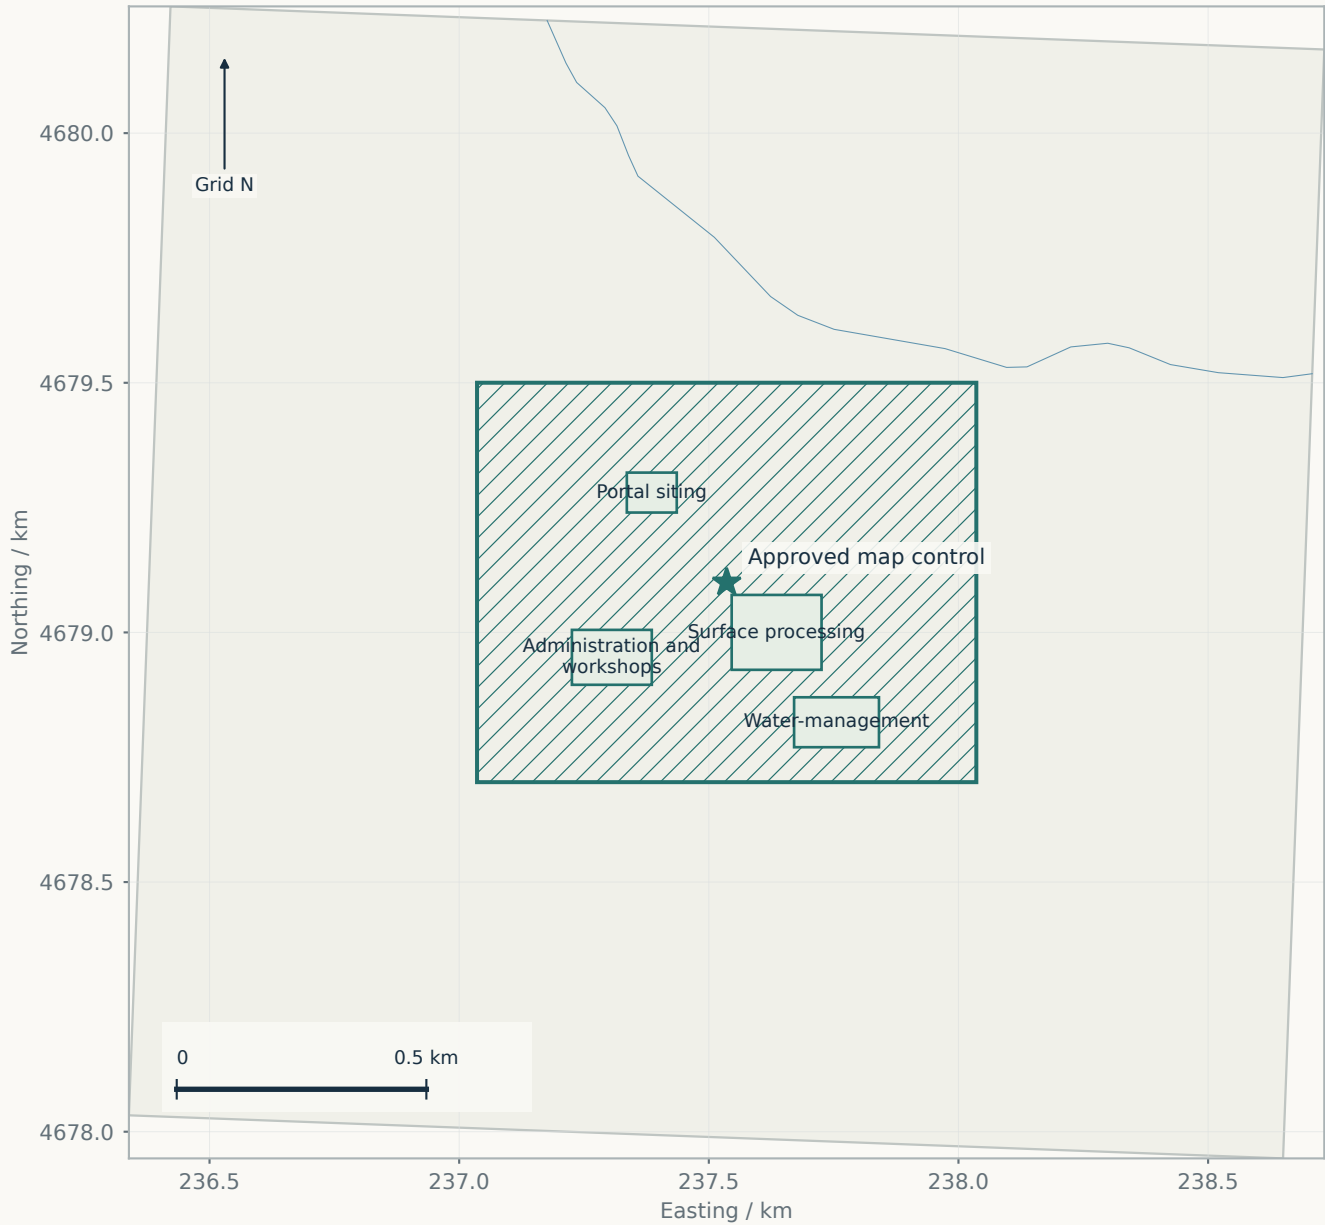

UNLOCATED REGISTER

J2 campus / historical offices / early railway / Cradle host parcels / exact Blackridge site

Red Wash / surface site study

Functional planning zones around the approved fictional control anchor; no surveyed portal or property boundary.

PROPOSED SITE GEOMETRY / GOVERNING ANCHOR LOCKED

GEOGRAPHIC CORRECTION

Sweetwater County / Great Divide Basin / Red Desert; anchor 42.22 N, 108.18 W. The prior Carbon County image geography is superseded.

SURFACE ENVELOPE

A 1,000 by 800 m phase-one planning window, about 198 acres. It is not the old scenario's property or disturbance acreage and is not a lease boundary.

ZONE PURPOSE

Processing, administration/workshops, water management and portal siting zones organize further study. Their dimensions are analyst proposals, not recovered image coordinates.

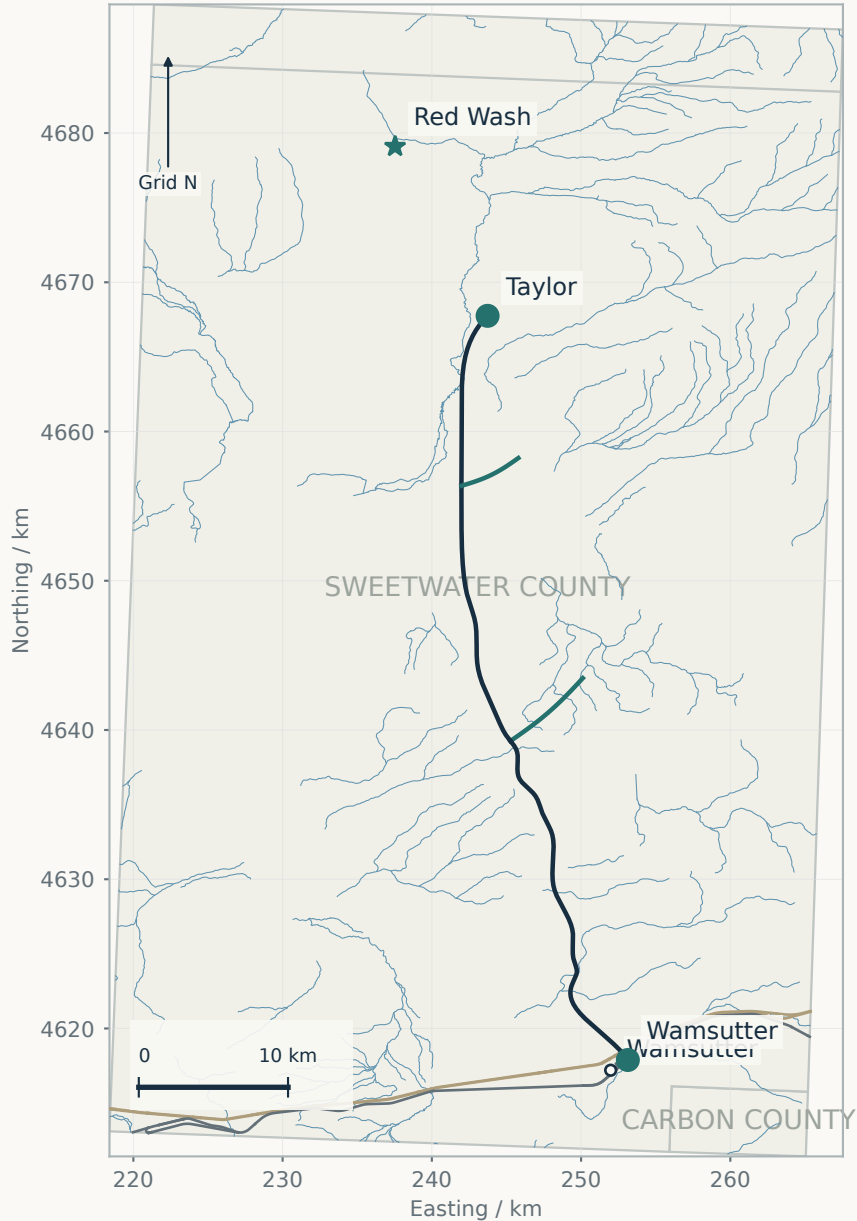

ENGINEERING REMAINING

Geology at the new anchor, decline/portal position, process design, waste facilities, setbacks, access, truck access from Taylor, utilities and legal land interests remain open.

BS&T / pre-acquisition case

Candidate A / two external-customer branches / Taylor transload / truck-only Red Wash access

ACCEPTED SYNTHETIC CASE / NO SURVEY OR REAL LAND-RIGHTS CLAIM

TEMPORAL CUT

06 Jan 2026, before SHIH acquired ARU on 07 Jan. Current track is the accepted case reconstruction, with explicit synthetic opening dates.

HISTORY RETAINED

1898 coal origin; 1954 rescue; 1968 Taylor mainline; 1972 East Materials; 1986 Mineral Transfer; ARU parent from 1991.

NO BACKFILL

1898 alignment and the surviving 14-16 miles in 1954 remain unlocated. Modern 40-mile geometry is not a measured early railway.

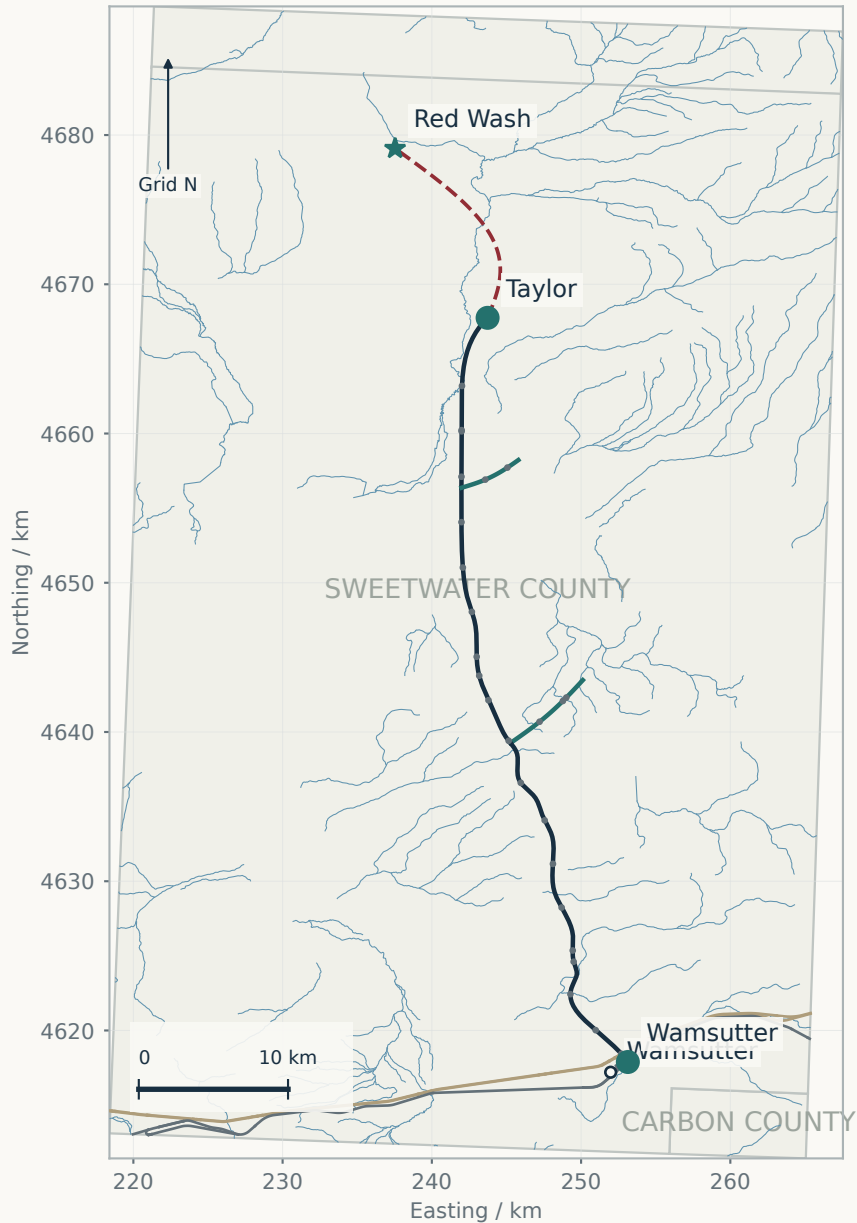

MINE SEPARATION

Red Wash is outside ARU. All 2025 mine movements remain external-carrier. The 2026 inbound interface and receiving facility are not shown as pre-acquisition operation.

BS&T / accepted case geography

Candidate A / two external-customer branches / Taylor transload / truck-only Red Wash access

ACCEPTED SYNTHETIC CASE / NO SURVEY OR REAL LAND-RIGHTS CLAIM

MEASURED SYSTEM

33.3485 mainline miles + 4.0000 East Materials + 2.6515 Mineral Transfer = 40.0000 route-miles. Yard tracks excluded.

MINE INTERFACE

Nine-mile modeled truck-only road. No mine rail spur. Uranium custody remains OPEN_GATED; inbound logistics does not approve outbound uranium transport.

IMPORTED ESTATE

12 facilities, 31 track-register segments, 26 structures. Geometry and roles derive from the accepted industrial source, including the Rawlins truck-served estate.

ENGINEERING LIMITS

Screening geometry, synthetic structures and source dates do not certify survey, load rating, land title or a real UP operating agreement.
