

CAMPUS / STATUS AND CAPACITY

September 2026 evidence state • Planning horizons are not completion dates

CONCEPT REVIEW / R02

01 R01 VISUAL BASELINE

APPROVED VISUAL REFERENCE

Four buildings, ten floors, 362 workplaces and 60 single rooms. Approval records a planning design, not land tenure or construction.

02 R02 SOURCE AND FLOOR EXTENSIONS

MODELLED DESIGN EXTENSION

Retain the approved master and three reference floors. Seven other floors are explicitly modelled design extensions with fixed stacked cores.

03 PARCEL AND ENGINEERING

UNESTABLISHED

Supported parcel, tenure, utilities, accessibility, transport demand and civil/structural/fire engineering remain unresolved.

04 PROCUREMENT, CONSTRUCTION AND OCCUPANCY

UNESTABLISHED

No procurement, permit, construction, fit-out or occupancy date is asserted. Execution requires supported decisions and technical approvals.

05 2031 AND 2036 CAPACITY REVIEW

CONDITIONAL HOLD FLAT CAPACITY

Both planning horizons retain 362 fitted workplaces and 60 rooms. Future workforce growth and additional floor capacity are unknown; no future construction is implied.

SOURCE-BOUND STATUS

R01 approved the drawing system and campus planning baseline. R02 extends the remaining floors and publication system. Neither approval is a land purchase, building permit, staffing authorization or completed construction record.

Actual dates remain null until supported. Growth horizons reserve choices; capacity changes require a source-based successor and transport/engineering review.

SH-SITE-0001 / SEPTEMBER 2026 / NO CONSTRUCTION COMPLETION ASSERTED
