

Close, allowance and legal-book reconciliation

DRAFT — exact-file review pending. Base scenario, 2027-01 through 2027-12. Synthetic reconstruction, not independent audit evidence.

Unit reporting and legal books are alternative views, not populations to add together. Core journal and enterprise replacement journal are different scopes: never concatenate them. Reporting clearing and legal management allocation retain their released classifications. Close validation checks complete monthly books, not an independent audit opinion.

What is included

Complete declared source populations are in working-papers.xlsx and the source CSV/SQLite tables. The workbook Guide maps every table to its complete sheet and source file. Values beyond Excel's 15-digit numerical precision remain text. Printed previews show leading rows and columns only; they do not limit the Excel population.

The workbook contains 10 complete source tables (15,084 rows), plus its Guide and Checks sheets. Repeated tables across packages are convenience mirrors, not additional transactions.

Financial measures

Measure	USD
Consolidated December ending cash	10,917,771.70
Consolidated December assets	213,783,072.15
Consolidated 2027 net income	-6,201,971.03

These measures use the stated Core, Treasury, consolidated or industrial view; they are not interchangeable populations. Source columns remain in the complete workbook.

Reconciliation and review

18 independently computed checks passed: population/source identity, decimal rollforwards and the applicable ledger or document joins. RECONCILIATION.json preserves each result; the workbook Checks sheet makes the tolerance test visible. No balancing adjustment was added.

Provenance

Release business-operations-v1.0.0, source 57cfa1b1c483ccf1f8b15d82c4cbdadbeef8063e. The evidence register pins archive, native database, each CSV and extracted database hashes. Other scenarios and later years remain in the native release and are not claimed human-complete by this package.
