Northern Nevada planning deed and cost boundary

SH-LEGAL-READ-NV-001 · Reviewed September 12, 2026

ACCEPTED FICTIONAL LAND ACQUISITION; no real conveyance

Accepted planning event

Fictional 7.5-acre Northern Nevada parcel, \$3M planning consideration, acquisition September 4, 2026. As of September 11: land acquired/preconstruction; no vertical building, installed critical plant or operating owned data center.

Parties and geometry

Mock grantor TRIC Development Holdings is fictional; grantee Sable Harbor, LLC maps to SHI. Approximate planning pin 39.5450, -119.4550 is not a real APN, cadastral parcel, recorded deed or metes-and-bounds survey.

Cost boundary

\$15.5M Phase-I envelope includes the \$3M land; about \$12.5M remains before production IT hardware. Do not represent the full envelope as spent. Studies are a \$200K forecast, not invoices.

Settlement and readiness

The executable land adjustment uses unresolved settlement clearing; it claims no paid cash, accepted vendor payable or loan. Construction commitment and migration require separately evidenced financial/technical gates.

Accounting and record trace

Land is separate from depreciating buildings/plant/hardware and from colo service. Use the runtime adjustment source; never invent a bank disbursement to balance the \$3M event.

SH-RT-DEED-001 · SH-RT-DEC-001 · SH-RT-FINANCE-001 · SHI · RUNTIME-NN-OWNED-DC

Missing evidence and limits

Real title documents, utility commitments, permits, provider quotes and settlement evidence are not present. Preserve accepted fictional land status while retaining these limits.
