Campus and operating-site tenure review

SH-LEGAL-READ-TENURE-001 · Reviewed September 12, 2026

MIXED RECORDED SITE STATES; plans do not establish title

Sacramento

The integrated campus program and saved plans express accepted functions and explicit planning assumptions. The primary corporate/J2 location is Sacramento; that decision alone does not supply a lease, recorded parcel title or completed construction.

Willow and Bedford

Fort sheds/Museum and Bedford building functions are source-backed concepts. Read each plan title/status and exact site record before asserting measured floor area, ownership dates or occupation.

Industrial sites

Keep mine, rail, terminal, trucking and warehouse functions with their accepted operating anchors. A structure plan cannot supply missing track engineering, underground workings, surveyed rights or an acquisition instrument.

External and historical

Coverage includes external hosts, historical sites and unresolved locations. These dispositions are retained; a mapped counterparty does not become a subsidiary or owned workplace.

Accounting and record trace

Join facility/site/building ID and source status before allocating property cost. Seats/areas are planning capacity, not employee count, lease commitment or recognized PPE.

Missing evidence and limits

Exact unsupported deeds, leases, parcel surveys, occupancy dates and construction certificates remain individual source gaps; plans cannot fill them.

Controlling source paths
