Complete source text follows. The source's own status and limitations remain in force; this edition does not establish execution, filing or approval.

MOCK DEED — SABLE HARBOR NORTHERN NEVADA DATA CENTER

Document ID: SH-RT-DEED-001

Version: 1.0.0

Prepared: 2026-09-11

Owner: Enterprise Technology Services with Legal, Finance, Procurement and Facilities

Authority: Owner-authorized PR119 runtime mandate, pending repository acceptance

Structured companion: enterprise/services/source/runtime_sites_2026-09-11.json;
runtime_capital_plan_2026-09-11.json

SYNTHETIC PLANNING INSTRUMENT — NOT A REAL DEED, NOT RECORDED, NO REAL APN, NO CLAIM AGAINST REAL PROPERTY.

This document exists solely to keep the SABLE HARBOR fictional planning universe, GeoPackage, facilities records, finance model, and construction timeline internally consistent. The runtime transaction remains a branch proposal pending acceptance of PR #119; the existing parent legal identity is already established in accepted canon.

Planning conveyance

Effective planning date: September 4, 2026

Record preparation / correction date: September 11, 2026. The effective planning date is not a claim that this document existed on September 4.

Grantor: TRIC Development Holdings — **fictional planning counterparty; not asserted to be a real entity or owner.**

Grantee: **Sable Harbor, LLC**, the existing parent operating company (finance/entity key SHI; geospatial parent reference SH-ENT-001). SHI does not imply an Inc. suffix and does not identify a newly created data-center company.

Parent-identity authority: Industrial ownership and internal formation record and controlled entity register. The earlier wording “Sable Harbor Industries, Inc.” was an implementation error, not an approved rename, incorporation, subsidiary formation, or property transfer.

Planning consideration: \$3,000,000.

Planning estate: fee-simple-equivalent ownership in the Sable Harbor planning universe, subject to ordinary utility, access, code, environmental, tax, and development obligations.

Planning description

A fictional approximately **7.5-acre** industrial parcel situated within the Tahoe-Reno Industrial Center / USA Parkway industrial district of Storey County, Nevada, centered for planning purposes near **39.5450 N, 119.4550 W**.

The coordinate is a planning anchor only. The planning parcel boundary must be generated as clearly synthetic geometry and must not trace, appropriate, or imply ownership of a real cadastral parcel. No assessor parcel number, recording number, legal metes-and-bounds description, title-company file, easement instrument, or surveyed boundary is represented.

Intended use

Development of the SABLE HARBOR Northern Nevada Data Center and associated secure utility, network, security, operations, loading, cooling, generator, energy-storage, and future expansion infrastructure.

Planning reservations

The planning conveyance is subject to: utility and carrier rights; access/fire requirements; drainage/stormwater requirements; permitting and code compliance; environmental restrictions; security setbacks; and future survey/design refinement. None of these are represented as executed real-world easements.

Status certification

As of 2026-09-11: planning acquisition is complete within the proposed fictional runtime record; preconstruction is in progress; no vertical construction or operating data center exists on the planning site. Payment, funding, transaction accounting, and approval-history reconciliation must be recorded separately; this document alone does not establish a cash disbursement or available financing.

Record-control rule

This mock deed may support fictional/canon accounting and map state only. It must never be submitted to a government recorder, lender, insurer, title company, real-estate counterparty, tax authority, or other real-world party as evidence of ownership.
