
Close one ARU reporting period

SH-CASE-CLOSE-01 · ARU_GROUP · January 2027 · base industrial forecast

Public learning material. New brief design is draft for exact-file review.

Situation

One reporting group has an opening trial balance, the complete month's journal and a closing reporting package. All five reconciliation areas stay within this scope.

Question

Can you reproduce the close and distinguish reconciled model balances from externally supported balances?

Open these files

1. [ARU period-close instructions](#) — Start with the period-close instructions and source population.
2. [ARU period-close working paper](#) — Work from opening balances through activity, reconciliations and statements.
3. [Evidence-request tracking guide](#) — Record follow-up evidence without changing accepted source facts.

Submit

Submit the balanced closing trial balance, five reconciliation conclusions, proposed adjustments only where supported, and the financial statements. Identify unsupported external evidence explicitly.

Scope limit

January 2027 is a forecast, not an actual completed close. Group reporting is not separate statutory books for every subsidiary. Do not invent aging, vouchers or adjusting entries to make the case look complete.
