

TAYLOR YARD AND SHOPS

Operating context and local planning envelope • Reference north is up

CONCEPT REVIEW / R02

SITE PROGRAM

B01 / Locomotive running-repair shop

1 levels; 1,440 m² concept gross area.

B02 / Dispatch and crew house

1 levels; 648 m² concept gross area.

STATUS

SYNTHETIC OPERATING

PRECISION

Local concept envelope, not a surveyed parcel or installed equipment record.

DEPENDENCIES

Original industrial source geometry and engineering constraints control.; Pedestrian routes segregated from rail movements, truck reversing and handling.; No expansion beyond source operating capacity; utilities/fire/containment design unresolved.; Shop track linkage references YARD-FAC-TAY-YARD-shop; concept building placement must be reconciled with that track before design acceptance. No fresh rail lines are drawn.; Heavy locomotive overhaul stays outsourced; running-repair hall does not imply full rebuild capacity.

Planning envelope / Reference north / Geometry and tenure status remain separate
