

BS&T / pre-acquisition scenario

Wamsutter-Taylor rail proposal; Red Wash served through Taylor with truck last mile, no mine spur.

PROPOSED GEOMETRY / ARU CLOSE 07 JAN 2026 / LAND RIGHTS UNRESOLVED

WORKING BUSINESS SCALE

About 40 pre-acquisition route-miles and 9,000 annual revenue carloads. BS&T has four locomotives, three generally available, and about 58 staff in the approved working model.

SCENARIO RESULT

The preferred Taylor C corridor measures 38.81 miles. The full fictional network is a proposed reconstruction of the working scale, not recovered historical track.

MINE SEPARATION

No mine spur. Approved design uses Taylor transload and truck last mile: 225 recurring rail loads/year, 300 design allowance.

HISTORICAL GATE

As of 06 Jan 2026, before Sable Harbor acquired ARU on 07 Jan. The centerline remains a proposed reconstruction, not recovered historical track.
